Sage Pastel Partner Payroll
History of Changes 2023 Update 1c

Below are the details of the changes made to our latest software release.

Enhancements

- PPP-8075 – With the new Sage branding, the logo and Payroll icon have been updated, as well as our splash screen.
- PPP-8099 – The help file has been updated to include all available directive fields.
- SPPP-1527 – The Sage Pastel Payroll Youtube playlist URL is now available in the Help menu.

Defects

- PPP-7946 – The user will no longer receive a run-time error on Performance Management if there are more than 500 records.
- PPP-8010 – The user will no longer receive a script error when selecting the Netcash icon on the employee masterfile.
- PPP-8066 – Employees with statuses 'On Leave' or 'Appointed' will now be excluded when importing batch transactions.
- PPP-8101 – When selecting the payslip icon on the employee masterfile, the employee filter screen will no longer appear incorrectly.
- PPP-8109 – IRP5 codes for retirement fund benefit transactions that calculate as R0.00 will now be exported to the IRP5 file correctly.
- SPPP-1547 – The EMP501 will no longer incorrectly omit values, for frequencies that are in terminated Yearend.
- SPPP-1556 – There will no longer be an exception for negative tax total 3697 or 3698.
- SPPP-1557 – Users will no longer receive an error 3 when generating a custom report.

Councils

- SPPP-1542 – MIBFA – The new MIBFA Reconciliation report has been introduced.

International

- PPP-7080 – Zambia – The age will now calculate correctly at the end of each period, for the purpose of NAPSA.
- PPP-8102 – Swaziland – The PAYE Monthly Declaration has been updated.
