

The Syscon F.I.T. System

The Syscon Field Integrated Time System, or 'FIT System' for short, is the best way to connect your field and back office and has a deep integration with Sage 100 Contractor. Payroll hours, time punches, and expenses can be entered by field staff, with important details imported directly to Sage with the click of a button!

F.I.T. System Setup - Getting Started

During the setup, we will get everything ready so you can get the most out of the FIT System!

- Connect the FIT System to your Sage data
- Configure general settings, pages, fields, and permissions according to your company's needs
- Training for your staff
- Recommendations on how to roll out the FIT System to your field, as smoothly as possible
- Getting the most out of the FIT System and Sage 100 Contractor. We look at the whole picture so you have the best experience from the Field time entry to cutting the checks!

F.I.T. System Monthly Subscription

Our FIT System monthly subscription includes everything you need to be sure things are running smoothly. Included with this monthly fee are all the technology updates, support of the app, and new features! Our per-user pricing model scales to perfectly "FIT" your business size.

This includes:

- Updates for all platforms: iOS, Android, Google Chrome, and Windows
- Updates for continued compatibility with Sage 100 Contractor
- Automatic sync with your Sage 100 Contractor data
- Import of hours and reimbursable expenses directly into Sage 100 Contractor at the push of a button
- Easy user management with role-based permissions

We would choose the F.I.T. System again in a heartbeat.
